

DISINFECTION AVAILABLE

Due to the COVID-19 outbreak, we have made numerous purchases of hard to find disinfectants and we are available to service your facilities. Purchasing concentrated quaternary disinfectants such as Clorox Pro Quaternary cleaner and Johnson-Diversey Traid III cleaner, we have the immediate capability of producing in excess of 9,000 quarts of virucide that is effective against most viruses including VRE, SARS, and MERSA. These are disinfectants that are generally used in hospitals.

In facilities that we service in an ongoing capacity, we are concentrating on “touch point” cleaning, paying special attention to door knobs, switch plates, hand rails, restrooms, and other areas that are frequently touched, and are the chief areas that virus can be spread..

We recommend that “personal space” such as desks, keyboards, and telephones be cleaned by individual employees, so as to not disrupt vital documents.
